Dear Joshua:

I am surprised to find that MOLECULAR PHARMACOLOGY was not added routinely to Current Contents. I know that Academic Press sent the first issue to Garfield, but I don't know if the delay is deliberate or accidental. Since you are on the Advisory Board and close to Garfield, perhaps you could help us with this. Obviously it is tremendously important to the role we want the journal to play, that it be brought as widely as possible to the attention of the scientific community.

Thanks.

I would assume it is a matter of reaction time but I will certainly call this to Garfield's attention as a matter of urgent priority.
